Science demands that all theory must be checked by experiment. Richard Feynman, Nobel Laureate in physics (1965), reminds us in a wonderful quote that "The test of all knowledge is experiment. Experiment is the sole judge of scientific truth." 1 It is because nonlinear physics can be so profoundly counter intuitive that these laboratory investigations are so important. This manual is designed to be used with the text Nonlinear Physics with Maple for Scientists and Engineers. Understanding is enhanced when experiments are used to check so please attempt as many of the activities as you can. As you perform theory, these activities, we hope that you will be amazed and startled by strange behavior, intrigued and terrorized by new ideas, and be able to amaze your friends as you relate your strange sightings! Remember that imagination is just as important as knowledge, so exercise yours whenever possible. But please be careful, as nonlinear activities can be addicting, can provide fond memories, and can awaken an interest that lasts a lifetime. Although it has been said that a rose by any other name is still a rose, (with apologies to Shakespeare) the authors of this laboratory manual have, in an endeavor to encourage the use of these nonlinear investigations, called them experimental activities rather than experiments. A number of design innovations have been introduced: A.

Since 1872 when traveling salesman Aaron Montgomery Ward realized he could eliminate the middleman and sell goods directly to his customers, Americans have had an ongoing love affair with the mail-order catalog, which continues undiminished even in today's online-driven world. The practical can find deals on furniture and clothing in L.L.Bean and Sears, the extravagant can consider his and hers matching helicopters, windmills, hot-air balloons, and submarines in the Neiman Marcus Fantasy Catalog; those looking to get their pulses racing can browse Victoria's Secret and Abercrombie & Fitch; while our inner swashbuckler can travel the world through the pages of the J. Peterman Owner's Manual where Moroccan caftans, Russian Navy t-shirts, and wooden water buckets from rural China entice the imagination. In *Catalog: The Illustrated History of Mail Order Shopping*, Robin Cherry traces the timeline of these snapshots from American history and discovers along the way how we dressed, decorated our houses, worked, played, and got around. From corsets to bell-bottoms, from baby-doll dresses and Doc Martens all the way to iPods, the history of these catalogs is the history of our lives and our culture. GIs during World War II were kept company by the models in the pages of lingerie catalogs; hockey goalies fashioned makeshift shin guards out of them during the Great Depression, and creative children across the country still play with homemade paper dolls cut from clothing catalogs. A number of celebrities got their start modeling for catalogs: Gregory Peck, Lauren Bacall, Katherine Heigl, Matthew Fox, and Angelina Jolie. Jimi Hendrix and Bob Dylan both got their first guitars from the Sears catalog. Organized into categories such as clothing, food, animals, and houses, author Robin Cherry explores the vivid stories behind Sears, Montgomery Ward, Lillian Vernon, Harry & David, Jackson & Perkins, and of course, 45 years of the Neiman Marcus Christmas Book. Insightful historical commentary places these catalogs in their social context, making this book a visual pleasure and a historically important piece of Americana.
